

acoustiguide Guide U+

A System for Every Destination

Guide U+ establishes the new standard for digital group guiding. The equipment's modularity lets you create a custom guiding system directly supporting your tour guides and visitors. Simply decide which transmitters and receivers you need, choose your preferred headphones and microphones, add in relevant accessories, and you have an elegant solution.

Simplicity at its Best

- All main settings are automated – one click connection means no configuration is necessary
- Automatic channel allocation allows multiple groups to easily operate in the same room
- Handles multiple transmitters for secondary presenters and enhanced visitor participation with up to 35 transmitters and an unlimited number of receivers per group
- Integrates with existing loudspeaker systems
- World's smallest and lightest receivers
- Inclusive - headsets can be fitted with induction loops for use with hearing aids and are compatible with cochlear implants and BAHAs

Functionality at Your Fingertips

- Establish networks with a single click, with no channels or frequencies to program and manage
- Every Guide U+ channel is 100% protected from interference from all nearby digital signals
- Receivers remain connected after turning off and on
- Receivers can connect to the room's existing amplification system
- Wall Pilot automatically connects receivers and transmitters to the room's predefined network
- Audio Hub allows two audio sources to be transmitted to any FM receivers in the room
- Loudspeaker comes with an integrated receiver
- Carry Case holds one transmitter and 12 receivers, including the charging elements
- Modular Charging Tray fits into any 19-inch rack or drawer and holds 12 receivers and one transmitter

Guide U+ Transmitter

- Intuitive user interface in 16 languages
- Two menu options: Quick or Full
- Choice of microphones
- 3.5 mm audio-in socket for external audio playback connection
- Simultaneous transmission to Guide U+ and dynamic FM receivers
- Audio bandwidth: 100 Hz – 7.3 KHz
- Range: up to 50 meters / 160 feet
- Battery: Li-Poly rechargeable (12h operating time, 2h recharging)
- Weight: 69g/0.15lbs
- Dimensions: 83x56x24mm/3.26x2.2x.94 inches
- Worn on belt (clip) or around neck (lanyard)

Guide U+ Receiver

- On/off and volume buttons
- Volume and battery status indicators
- Headphone socket: 2.5 mm (max. 150 mV/32 Ohm)
- Battery: Li-Poly rechargeable (10h operating time, 2h recharging)
- Weight: 20g/0.04lbs
- Dimensions: 66x29x12mm/2.6x1.14x.47 inches
- Worn around neck with lanyard

Wall Pilot

- Dimensions: 96x80x42mm/3.8x3.1x1.6 inches

DigiMaster X Receiver

- Connects via 3.5 mm output socket to amplifier's analog audio input
- Mini-USB power input
- Dimensions: 90x90x20mm/3.5x3.5x.8 inches

DigiMaster 5000/7000 Loudspeaker

- Dimensions: 885x72mm/35x2.8 inches

Dynamic Pass-around Microphone

- Handheld
- Battery: Li-Poly rechargeable
- Weight: 110g/0.24lbs
- Dimensions: 210x32mm/8.26x1.26 inches (antenna is 150 mm/5.9 inches)
