

Opus Content Manager (OCM)

The Opus Content Manager (OCM) is Acoustiguide's proprietary software package, designed and developed by our experienced software engineering team to offer clients full independence over the process of creating and updating audio or multimedia tours for Opus players.

The OCM is part of Acoustiguide's cutting-edge Opus audio & multimedia system launched in 2008. The system includes the Opus Touch™ touchscreen device and the Opus Click™ keypad-driven device.

OCM enables clients around the world to define, create, build and load Opus players with any desired tour. From the most basic audio tour to the most sophisticated multimedia one, clients can include an unlimited number of items of any type, in an unlimited number of languages, all in a quick and intuitive manner.

The software runs on Windows-based PCs, and offers an easy to use interface for the smooth transfer of audio and multimedia files from the user's PC onto the Opus player.

Just a few, simple steps to a new tour:

Create the tour structure of your choice:

- Select Opus Click or Opus Touch
- Name your tour: Family tour; Children's tour; Special exhibition etc.
- Select languages (unlimited number)

Setup the behavioral attributes of your choice:

- Menu choices: Scrolling type; Color scheme; Power save settings; Key sound; Auto triggering; Special keys (such as information layering); Previous/Next etc.
- Content choices: Auto play; Auto stop; Embedded

titles; Splash screen per language etc.

- Tour choices: Number of items, Types of items in the tour
- Item choices: Video; Slide show; Audio; Survey;

Attach the corresponding media files:

- Import media: Drag & drop the files

Preview, Verification & Uploading

- Software verifies choices and alerts user to any errors e.g. media files
- Software automatically uploads the content package from PC to Opus players

OCM Features:

- Runs on any Windows-based PC
- Full capability to create & update Content packages for Opus Players
- A friendly, easy-to-use, on-screen interface
- Enables creation of an unlimited number of tours in an unlimited number of languages
- Drag & drop of media files
- Preview and verification of content package prior to upload
- Automatic upload of the created content onto the Opus Players
